Windows 7 PPTP VPN Setup steps

1. Open Network Connections

First, Open *Network and Sharing Center* from Control Panel. Then choose *Set up a new connection or network*.

2. In the next window, choose *Connect to a workplace*.

3. In the next window, choose Use my Internet Connection (VPN).

4. Type in the name or the IP address of a Our VPN Service server. You have to check the email you have received when you have paid for the Our VPN Service account.

Type the Internet a	ddress to connect to
Your network administr	tor can give you this address.
Internet address:	Check P address or hostneme in email
Dystination name:	HideP VPNL
Use a gmart card	
😵 📃 Allow other peop This option allow	sle to use this connection is anyone with access to this computer to use this connection.
Qon't connect m	ow; jusit set it up so I can connect later

5. Then enter Our VPN Service as the name the connection in the destination name box (you can name it as you want). Then click *Next*. In the next window, enter your user name and password for the VPN access. And click *Create*.

Type your user nar	ne and password	
User name	your@email.com	
Beisworth	••••	
	Show characters	
	Emember this password	
Domain (optional):		

6. You're all set if you see the next window as below. You should see this screen next. Click the "Close" button to return to the "Network and Internet" screen.

7. In the *Connect to a network* screen, you should see the Our VPN Service connection that you have just set up.

8. Right–click on the Our VPN Service connection document, and choose *Properties* from the menu.
